

Professional Summary

Full-stack web developer with 5+ years of experience delivering production websites, customer-facing platforms, custom WordPress solutions, and workflow automations. Strong hands-on experience with WordPress/WooCommerce, Astro, React, Next.js, Node.js, PHP, MySQL, REST APIs, headless CMS architecture, webhooks, Airtable, and n8n. Experienced in translating business requirements into maintainable web solutions, modernizing legacy websites, building internal tools, and launching end-to-end digital products.

Experience

Full-Stack Web Developer Full time - Feb 2024 Present

Levein Group

- Develop and maintain client and internal web platforms using Astro, React, WordPress, WooCommerce, Node.js, MySQL, REST APIs, webhooks, and headless CMS patterns.
- Built and launched the Levein Group corporate website in under one month using Astro; integrated the company job portal, talent-pool resume submission, CV status tracking, CMS content, and webhook-driven workflows.
- Built Remote Jobs in Asia as a functional WordPress job portal, including custom plugin development and Airtable integration for structured data submission and operations.
- Delivered Treat It landing pages and a fully functional WooCommerce website; created a custom plugin to automate WooCommerce workflows with Airtable.
- Enhanced the UK-based GP Service website and developed its booking flow in React; planned and executed modernization toward Astro for improved maintainability and performance.
- Built Levein Asset Tracker with React, Node.js, and MySQL to manage company assets and records.
- Created n8n automations for CV downloading, talent-database processing, and automated CV-reading workflows.
- Created n8n automations for CV downloading, talent-database processing, and automated CV-reading workflows.
- Developed multiple Webflow projects, including the i360 website for a U.S.-based client, and collaborated with a Pakistan-based development team to build and enhance the GP Service website using Webflow.

Web Developer Nov 2021 - Jan 2024 2 yrs 3 mos

Efutures

- Developed and maintained high-traffic WordPress and PHP/MySQL websites, including People's Leasing & Finance PLC, EFutures Australia, Lankan Business Online.
- Built custom APIs and WordPress functionality, implemented multilingual web experiences, and continuously improved performance, stability, and maintainability.
- Recovered and secured a legacy WordPress website after a malicious attack by removing injected files and spam links, updating the platform, troubleshooting plugins, and strengthening site security.
- Developed custom functionality including a mail-store plugin and contributed to a Vue.js HR management system.

Associate Web & Software Developer Jan 2021 – Sep 2021 8 mos

Earrow (Pvt) Ltd

- Participated in business-analysis sessions and requirements gathering for client projects, producing implementation-ready requirements and UI concepts
- Built WordPress and CodeIgniter solutions using PHP, JavaScript, Bootstrap, CSS, and MySQL for Center for Banking Studies, SLITHM, and IIHS.
- Developed reporting, curriculum-generation, and student-information management features and maintained Git-based development workflows.

Intern Web Developer Jan 2020 – Jun 2020 6 mos

Madzoo Digital (PVT) Ltd

- Contributed to the development and maintenance of multiple client websites, working alongside the development team to deliver responsive and user-friendly web experiences.
- Supported website implementation, front-end development, content integration, testing, and issue resolution across client projects.
- Worked on projects including FlyCatcherTrails, Crystalstone, and PcassiZt.
- Collaborated with designers and developers to translate project requirements and UI designs into functional web pages.
- Assisted with debugging, cross-browser testing, responsive improvements, and general website maintenance.

Projects

- Nuts On Top** | Full-stack Next.js + WooCommerce project focused on a modern storefront and commerce experience.
- Payzo Lanka** | React-based product concept focused on reducing cash-on-delivery friction in Sri Lankan e-commerce.
